

## **Resource Systems Named to the Inc. 5000 List Of Fastest-Growing U.S. Companies**

(New Concord, OH) -- Inc. magazine named Resource Systems (New Concord, Ohio) on its annual ranking of the 5000 fastest-growing private companies in the country. The magazine publishes the list each year, which crosses all industries and market segments. The list provides a view of companies across the country that utilize cutting-edge business models, as well as older companies showing impressive growth. Companies such as Yahoo, Google, and others debuted on this list in their early years.

The management at Resource Systems is proud to be recognized by Inc. Magazine. "We've had some great growth recently and it's largely because of the dedication and creativity of our people. They understand that in order to grow you must think about solutions in ways that haven't been imagined before." said Greg Adams, CEO of the company.

Resource Systems is the developer of CareTracker, an innovative electronic documentation system for long-term care facilities. It uses wall-mounted touch screen computer devices strategically located throughout nursing facilities, allowing caregivers to collect and retrieve information about residents.

Resource Systems was founded in 1980 and employs 70 people. CareTracker was first introduced in 1999 and has been growing in popularity ever since. "CareTracker is unique in the industry and the dedication of our employees in caring for the customer has fueled the growth of the company," said Larry Triplett, President of Resource Systems.

The 2008 Inc. 5000 list measures revenue growth from 2004 through 2007. To qualify, companies must be U.S.-based, privately held and have had revenues of at least \$200,000 in 2004, and \$2 million in 2007.
